

ESOL (English for Speakers of Other Languages)

Whilst this course has a formal syllabus, we would be delighted to discuss how the programme could be designed and delivered to meet your organisation's needs. We will happily present any programme on your premises.

Today's workforce is international - multicultural and multilingual. Communication is the key to business success and ESOL is the key to communication. Participants should understand the Roman alphabet, but do not need to know any English.

We will explore speaking, listening, reading and writing in English within everyday situations, with a focus on developing real life communication skills needed for work, leisure and the life within the community. We hope to provide participants with tasks and exercises that will help them gain confidence in everyday life.

English for Speakers of Other Languages is an established way to enhance the language skills of those with a basic knowledge of English. ESOL courses help with the key language skills:

- Speaking & listening
- Reading
- Writing
- Pronunciation
- Vocabulary
- Foundations in grammar

The course aims to prepare students for the City & Guilds Skills for Life ESOL exam, which is a nationally recognised certificate in English.

Duration: 40 hours or to suit

Delivery: ESOL is also available as an 'open' course, with start dates throughout the year. Call us for the latest information.
