

## *IOSH Managing Safely Certificate*

The course is targeted at those managers and supervisors in any organisation, small or large, who require better skills and abilities with regard to Health & Safety Management.

### *Course Aims*

The course aims to ensure that those who attend the course and successfully achieve the required standard are more knowledgeable about the following key practices:

- Assessing and controlling risks
- Understanding responsibilities
- Identifying hazards
- Investigating accidents and incidents
- Measuring performance
- Protecting the environment

### *Learning Outcomes*

The Managing Safety syllabus allows delegates to take on board the following essential learning points:

- Safety Management, risk assessment and accountability
- Safe systems of work and risk control procedures
- Legal requirements for health & safety management
- Legal requirements for reporting and investigation of accidents
- Active and re active monitoring techniques
- Reviewing and auditing safety systems
- Creating a safer environment
- Protecting the working environment

The programme is assessed with a 45 minute assessment at the end of the course and a written risk assessment within 2 weeks of the last training day. The latter part of the assessment is usually based on the delegate's workplace and the activities carried out there.
